**Spatial Coordinates of the facility:**

Latitude: 42.40060N, Longitude: -82.17390E

UTM Zone: 17N

**List of Toxic Substances created at the facility:**

Manganese – CAS Number: No single CAS number applies

Zinc – CAS Number: No single CAS number applies

PM<sub>10</sub> - CAS Number: No single CAS number applies

**Facility's approach to toxic substance accounting:**

Mass balance for 'contained in product' based on incoming inventory records (materials entering facility), formula composition for waste characterization data and waste manifests for off-site disposal.

No inventory due to order on demand system.

**Facility's Objectives and Targets:**

The facility's goal is to continue to investigate ways to reduce the use of Manganese, Zinc and natural gas which produces Particulate Matter. Due to the fact that their customer mandates specific material compositions be used to meet customer performance specifications, the company is unable to commit to a specific option for reduction.

The name of the substance and the Chemical Abstracts Service (CAS) Registry number for the facility:

Name: Manganese

CAS Number: No single CAS number applies
