Plan Summary Statement

This plan summary accurately reflects the content of the toxic substance reduction plan for 2-Butoxyethanol, prepared by Plastico Industries Limited and dated December 19, 2014.

Statement of Intent

Plastico Industries Limited is committed to demonstrating the highest standards of environmental management and employee safety. 2-Butoxyethanol is being used by Plastico in our processes. Whenever feasible we plan to eliminate or reduce the use, creation and discharge of ethyl alcohol in full compliance with all Federal and Provincial Regulations.

Reduction Objectives

Our goal is to continue to research possible ways to reduce the use of 2-Butoxyethanol at our facility.

Description of Substance

2-Butoxyethanol is an ingredient found in the primer used by Plastico in production.

Toxic Substance Reduction Option to be Implemented

Due to the fact that customers demand that certain materials be used in the production of their products the company is unable to commit to any of the Options that were presented throughout this plan.

The facility will continue its endeavors to find alternate materials and methods which could eventually result in the reduction of the amount of 2-Butoxyethanol being used.

Plan Certification for 2-Butoxyethanol

As of December 15, 2014, I, Mike Zinger certify that I have read the toxic substance reduction plan for the toxic substance referred to below and am familiar with its contents, and to my knowledge the plan is factually accurate and complies with the Toxic Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under that Act.

Plan Summary Statement

This plan summary accurately reflects the content of the toxic substance reduction plan for Sodium Nitrite, prepared by Plastico Industries Limited and dated December 19, 2014.

Statement of Intent

Plastico Industries Limited is committed to demonstrating the highest standards of environmental management and employee safety. Sodium Nitrite is being used by Plastico in our processes. Whenever feasible we plan to eliminate or reduce the use, creation and discharge of ethyl alcohol in full compliance with all Federal and Provincial Regulations.

Reduction Objectives

Our goal is to continue to research possible ways to reduce the use of Sodium Nitrite at our facility.

Description of Substance

Sodium Nitrite is an ingredient found in the soap/rust inhibitor used by Plastico in production.

Toxic Substance Reduction Option to be Implemented

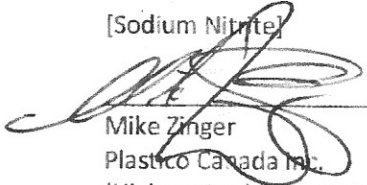

Due to the fact that customers demand that certain materials be used in the production of their products the company is unable to commit to any of the Options that were presented throughout this plan.

The facility will continue its endeavors to find alternate materials and methods which could eventually result in the reduction of the amount of Sodium Nitrite being used.
